

Reminder Cards

These posters are designed to support students in their understanding and application of computational thinking patterns. They can be provided directly to the students, or used as visual aids within the classroom.

Created by: Susan Miller, University of Colorado, School of Education

These curricular resources have been designed as part of the Scalable Games Design project.

Just because you
don't see the agents,
doesn't mean they
aren't there!

Agents can be drawn on top of one another,
causing major havoc in your game.

What you see

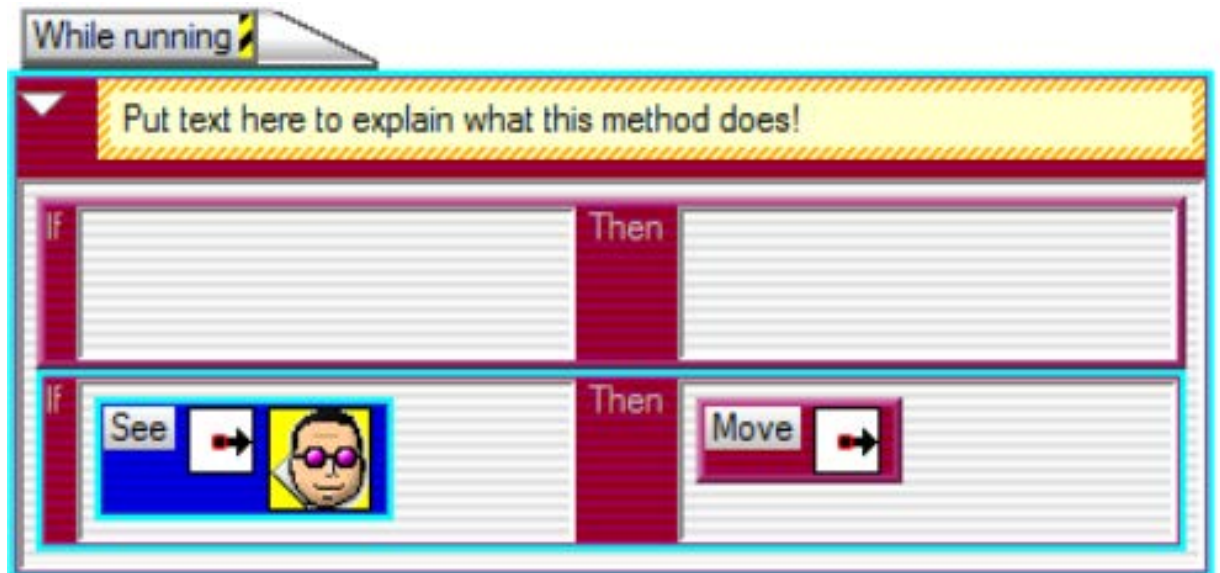

What your game sees

Just because the hole is empty, doesn't mean you can ignore it!

Agents will not SKIP empty rules.
Delete empty rules!

Order Matters!

The program will start at the top of the instructions and work down.
If your program isn't working, try changing the order of the code.

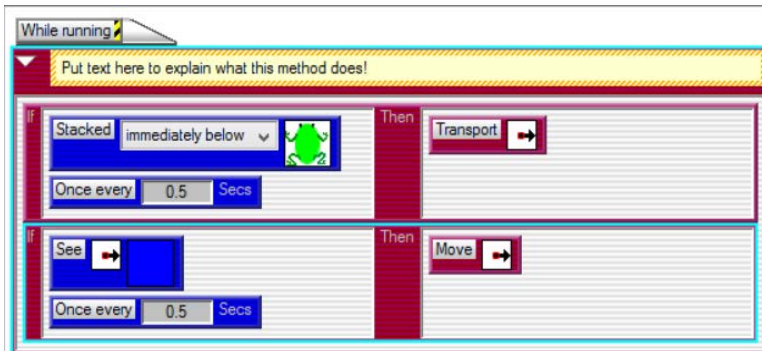

IF.... ELSE..... IF....

If the first condition is TRUE,
it will NOT move on to the next rule!

No “Right Way”

There are many ways to code the same actions... take time to see how others are solving problems.

OR

Rules
won't
work until
you press **APPLY!**

SAVE your
worksheet

APPLY your rules

**Stop everything
and . . . WAIT!**

WAIT is a command that
stops the simulation or game
for a set period of time.

Once every.....

JUST
SLOW
DOWN

ONCE EVERY is a command that slows down one part of the simulation or game.

Think
before you
Click

Do you want a new
RULE
or a new
METHOD??

New Rule

New Method

Computers read

Code

Not

Minds

Check your code, and then
check it again.

Watch out for typos!

Little mistakes can cause huge frustrations!
